-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "12" has been used to designate both housing and passage. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 26 and 32. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and

Art Unit: 3682

informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: On page 4 line 23 "sump 14" should be --sump 16--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Schnitzer (US 2002/0053489).

Schnitzer discloses a hydraulic fluid storage apparatus for a transmission comprising: a transmission housing (page 2 ¶ 17); a rotating transmission component (7) supported in said housing (see Fig 2); a transmission sump (1) secured to said housing to provide a fluid storage chamber (see Fig 2); a second fluid storage chamber (2) disposed in fluid communication with said sump (see Fig 2); a pump (9) for circulating hydraulic fluid in said transmission; said rotating transmission component being operable to impose a centrifugal component to the fluid in the sump to create a flow restriction to interrupt fluid communication between said sump and said second fluid storage chamber to increase the fluid storage in said second fluid storage chamber and limit the fluid level in said sump to a predetermined maximum level (page 2 ¶ 21).

Re claim 2, said second fluid storage chamber being disposed on said transmission housing at a level higher than said first storage chamber (see Fig 2).

Re claim 3, said rotating transmission component being continuously rotated during transmission operation (page 2 ¶ 21).

Re claim 4, said flow restriction (11) including a hydraulic dam disposed between said first and second fluid storage chambers (see Fig 2).

Re claim 5, said flow restriction being reduced and said fluid in said second chamber returning to said first chamber when the speed of said rotating transmission component decreases below a predetermined value (page 2 ¶ 22).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
